

DN-2000F

Double CD Player of the Industry Standard

With the dance scene bigger than ever, and more music only available on CD, professional DJs are turning to one source for the best in DJ CD players - DENON. When others were first thinking about Pro players, DENON introduced their 2nd generation DJ CD Player - the DN-2000F. Developed with direct input from DJs worldwide and refined through countless hours of at-the-club research, the DN-2000F will satisfy the most demanding DJ. Just as important, DENON's legendary CD sound quality will thrill audiences.

SUPER GOODS OF THE YEAR, 1993

Cue to Music & Instant Start

When the PLAY button is pressed, audio starts instantly (within 0.03 sec). No delay, and no lag.

Pitch Control

The long stroke sliding faders work just like the pitch control on a turntable. The play speed of each CD can be individually adjusted by $\pm 8\%$ allowing the DJ to match beats-per-

minute of songs in a set.

Pitch Bend

The DN-2000F offers the world's first PITCH BEND feature on a CD player.

Born out of the practice used by DJs on vinyl, DENON has packaged a unique PITCH BEND system to make beat mixing a breeze.

Once the beats-per-minute of two tracks are matched using the Pitch Control, PITCH BEND helps get the beats in synch. Press the + or - button changes speed momentarily. The PITCH BEND effect will not change the reference pitch set by the sliding fader.

Sound Quality

What truly distinguishes the DN-2000F from all other CD players, home or professional, is its legendary DENON sound quality. The DN-2000F employs the same technology that has made DENON CD Players the choice of audiophiles worldwide, including dual 18-bit D/A converters and 8x oversampling for the most accurate and linear digital sound reproduction.

Self-Locking Transport

The self locking transport on the DN-2000F means that whenever the power is turned off, the laser pickup automatically locks in place. This translates into a major convenience for mobile DJs who don't want to trouble themselves with remembering to tighten transport locking screws.

Proven Reliability

As the leader in professional CD Players, DENON has developed the DN-2000F to withstand the rigors of club or mobile use. The DN-2000F carries with it the reliability that have made DENON CD equipment the choice of radio stations across the world, where DENON CD Players operate up to 24 hours a day.

DJ PRO SOUND

Denon - Fortaking the best features of their 4000F dual transport CD player and putting them into the popular and more affordable 2000F.
