

KL Panel

The **KL PANEL™** is a full-color-spectrum LED soft light providing high output, precise color temperature, full spectrum color rendering and even washes. Optimized for the tunable white light requirements of Film and Television, it is an ideal key and fill light source for many situations requiring outstanding performance and color quality.

The KL PANEL incorporates a highly efficient 6-in-1 LED package that produces up to 24,000 field lumens. Compact and portable, the fixture can be mounted on stands or suspended using the included Junior pin or any regular clamp. It is fully self-contained without the need for external power supplies.

The KL Panel can be operated from industry standard DMX, Art-NET or sACN protocols, or can be adjusted fully standalone from the included encoders for instant access to Intensity, Color and other important settings right from the OLED display and encoders. The display and encoders are positioned for easy access while the KL Panel is mounted on a stand.

Multiple protocol and control options provide fast and efficient operation in any situation. Direct control, remote DMX or Ethernet connections, as well as Elation's E-FLY™ wireless system, allow for flexibility of use.
